

BIMAL

Web Developer • Cybersecurity Specialist • Creative Designer & Animator
Nepal | bimalweb842@gmail.com | wa.me/+977-980-5638207 | linkedin.com/in/bimal-bbb7662a6

PROFESSIONAL SUMMARY

Namaste, it's me Bimal, from Nepal, and so on, with over 7 years of combined experience in web development, cybersecurity, graphic design, and animation. Driven by a passion for technology and creativity, with proven expertise spanning frontend development, web application penetration testing, network security, 3D/2D animation, and IoT systems. Currently pursuing a Bachelor's degree while actively working as a freelancer, content creator, and educator. Known for a hands-on, self-taught approach and a deep enthusiasm for exploring the evolving landscape of cybersecurity.

CORE COMPETENCIES

Web Development | Cybersecurity | Graphic Design & Video Production | 2D/3D Animation | IoT & Embedded Systems

TECHNICAL SKILLS

Programming & Scripting Languages

Bash Scripting: 6 years

Python: 5 years

C Language: 4 years

JavaScript: 2 years

Java: 1 year

React: 1 year

Web Development

Frontend: HTML5, CSS3, JavaScript, React, Bootstrap

UI/UX Design: Figma, Canva, responsive design principles

Experience: 3 years

Cybersecurity

Domains: Web Application Penetration Testing, Network Analysis, Vulnerability Assessment, OWASP Top 10 Testing, Embedded System Security

Tools: Burp Suite, Nmap, Wireshark, Hydra, OWASP ZAP, Metasploit

OS / Platforms: Linux (in-depth), Kali NetHunter, Termux

Experience: 5 years (started with Termux & Kali NetHunter; evolved into tool development and web app pentesting)

Graphic Design & Video Production

Software: Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, Adobe After Effects, DaVinci Resolve, Filmora

Mobile Tools: PixelLab, KineMaster, Lightroom, Alight Motion, Adobe Photoshop Express

Specialties: Photo editing, video editing, cinematic production, motion graphics, advertisement design, branding, visual storytelling

Experience: 7 years

2D & 3D Animation

Software: Blender, Autodesk Maya, Adobe Animate CC

Mobile Origins: Prisma3D, FlipaClip

Specialties: Character animation, scene design, moral story animations, brand promotional animations, educational content, explainer animations, basic VFX-style motion

3D Experience: 3 years | 2D Experience: 1 year

IoT, Embedded Systems & Automation

Hardware: Arduino, ESP8266, basic PCB electronics, circuit design, sensor integration

Projects: Arduino robotic cars, wireless communication prototypes (walkie-talkie), mini drone concepts, generator/power system experiments

Automation Tools: Selenium, Playwright, n8n

Other: Docker, Git/GitHub, Microsoft Office

PROFESSIONAL EXPERIENCE

Electrician & Hardware Repair Technician | Repair Center (Practical Work) — Approx. 1 Year

- Performed component-level diagnostics, firmware troubleshooting, and device repair on mobile devices and electronics.
- Developed deep understanding of hardware behavior, embedded firmware, and electronic repair workflows.
- Built expertise in power systems, circuit troubleshooting, and device-level hardware diagnostics.

Freelancer | Independent / Various Clients — Ongoing

- Delivered frontend web development projects using HTML, CSS, JavaScript, and React for local and online clients.
- Provided graphic design services including social media visuals, branding materials, promotional content, and advertisement design.
- Created 2D/3D animations for brand promotions, educational content, moral stories, and short cinematic clips.
- Conducted cybersecurity assessments and web penetration testing for small projects.

Lecturer / Educator | Self-Employed / Community — Ongoing

- Delivered instructional sessions on IT fundamentals, web development concepts, and cybersecurity awareness.
- Mentored students and self-learners in practical technology skills.

Content Creator & Digital Marketer | Independent — Ongoing

- Created engaging digital content for social media platforms, including short-form video, graphic posts, and motion graphics.
- Developed and executed digital marketing strategies for small businesses and personal brands.
- Managed content pipelines covering ideation, production, editing, and publication.

NOTABLE PROJECTS & WORK

Cybersecurity

- Built custom security tools and scripts for web application vulnerability testing using Python and Bash.
- Performed OWASP Top 10 testing and web penetration testing engagements on practice and real-world targets.
- Conducted network traffic analysis using Wireshark and Nmap for educational and practical security research.

Animation & Creative

- Produced moral story animations in 2D and 3D for educational and social awareness content.
- Created promotional animations for brands and small businesses, including product showcases and explainer videos.
- Developed short cinematic clips and VFX-style motion sequences using Blender and Adobe After Effects.

IoT & Embedded Systems

- Built an Arduino-based robotic car with remote control via wireless communication.
- Designed and experimented with walkie-talkie prototypes using ESP8266 for wireless data transmission.
- Explored mini drone concepts and power generation experiments for practical electronics learning.

EDUCATION

Bachelor's Degree (Currently Pursuing) | Institution – Nepal — 2024 – Present

Pursuing undergraduate studies; expected completion in progress.

Higher Secondary Education (Grade 12) | Devi School, Birtamode, Jhapa — Completed

Completed secondary schooling with a focus on science and technology.

PROFESSIONAL TIMELINE

2018 – Present: Active across web development, cybersecurity, design, animation, IoT, and related fields.

Over 8 years of self-driven learning, practical experimentation, and real-world project execution.

FIELDS OF INTEREST

Cybersecurity (primary passion) • Web Development • Graphic Design & Motion Graphics • 3D Animation & Visual Effects • IoT & Embedded Systems • AI-Driven Automation • Content Creation & Digital Marketing
